

VW Ask a Driver Interview Guide

Sept 4, 2018

INTRODUCTION

Hello, my name is And I am from a design agency called DDB. We have been hired by Volkswagen in order to help them understand how people conduct research, both when shopping for cars and after purchasing a car. Today we'll be looking at the Volkswagen Canada website to gain insights on how we can make the experience better for you.

It is important to remember that you are not the one being tested. In fact, you're the one doing the testing! If there is something that does not work or you find confusing, it is not your fault, but an improvement to be made to the design. Don't worry that you're going to hurt our feelings. We want to know any frustrations you experience so we can make the site better.

As we go through the test, I'm going to ask you as much as possible to try and think out loud: to say what you're looking at, what you're trying to do, and what you're thinking. This will be a big help to us in making the site better for its users.

The test should take no more than an hour to complete. We'll start with a 20 minute conversation about how you shop for cars and then move on to the website testing. All of your responses will be kept confidential and anonymous. Your name or identity will not be associated with the results in any way.
